

# Minx Xi Quick-Start Guide

## Network setup

To enjoy network music playback, internet radio and streaming services, you must first connect your Minx Xi to your home network following the instructions below.

This simple quick-start guide should be enough for most users to get started, however, for more detailed step-by-step instructions, please consult the Minx Xi user manual available at [www.cambridgeaudio.com/MinxXiSupport](http://www.cambridgeaudio.com/MinxXiSupport)

OR

## Wireless network connection

- 1 Connect the supplied Wi-Fi dongle, insert the power lead and switch on mains power. Press the Standby button on the front of the Minx Xi to switch the unit on.

Your Minx Xi will now automatically scan for wireless networks within range.

**Be sure not to unplug the Wi-Fi dongle when your Minx Xi is switched on. The Wi-Fi dongle must be connected before you power on.**

- 2 The Minx Xi will then find any nearby networks, select your home network by scrolling and then pressing the rotary dial.

- 3 If the screen displays *Enter WEP key* or *Enter WPA key*, use the rotary dial to select each character of your password in turn, pressing the rotary dial in to select each character.

Note: The WEP and WPA codes are case sensitive, so you must enter them exactly.

**Don't know your Wi-Fi password key? It's commonly found on a label on your internet modem/router.**

**If you make a mistake, you can delete characters by pressing the  $\square/X$  button.**

- 4 After entering the final character, use the rotary dial to select and press the  $\leftarrow$  character at the end of the character list. The Minx Xi will now connect to the network.

## Wired network connection

- 1 Using an Ethernet cable, connect your Minx Xi to a free Ethernet port on your router. Connect the power lead and switch on mains power. Press the Standby button on the front of the Minx Xi to switch the unit on. The Minx Xi will automatically connect to your home network.

## Congratulations!

Now that you have successfully connected your Minx Xi to your home network, you are ready to enjoy network music playback and listen to internet radio or streaming services.

Upon connection to your home network, your Minx Xi will check for any firmware updates that may be available. If prompted, select YES to upgrade the firmware to the latest version.

## Network music playback

To stream music over your network from a computer or NAS drive with a UPnP/DLNA function, ensure that your UPnP server is set up and switched on. You may need to consult your UPnP/DLNA server/NAS drive instruction manual for details.

- 1 Navigate to the Media menu, then the UPnP Servers menu and press the rotary dial to select your server. This will appear as you have named it in the server setup (eg. Twonky Media, Beni's Music Library, etc).

- 2 The Minx Xi will now load the appropriate menus from the selected server, allowing you to browse and play back music from that server by scrolling and then pressing the rotary dial.

**You can also browse and play using the Stream Magic app or supplied remote control.**

## Help and Troubleshooting

For help and FAQs visit: [www.cambridgeaudio.com/MinxXiSupport](http://www.cambridgeaudio.com/MinxXiSupport)

Consult the online user manual for more detailed information.

## Internet Radio

Requires an active internet connection  
See overleaf for network setup

**1** Select Internet Radio from the Minx Xi's Home Menu by scrolling and then pressing the rotary dial.

**2** Use the rotary dial to choose how you wish to browse and play internet radio. For example, by Location or Genre.

If you choose to Search for internet radio stations, enter the full name or first part of the station name by scrolling and then pressing the rotary dial.

**3** When the desired station is displayed, press the rotary dial to select and play it.

You can also browse, play and store presets using the **M** button or via the Stream Magic app.

## Bluetooth

The Minx Xi is supplied with a BT100 Bluetooth adaptor. This allows the Minx Xi to receive wireless Bluetooth audio from suitable phones/tablets and laptops.

To send Bluetooth audio to the BT100 you must first pair your phone/tablet or laptop with the BT100.

**1** Connect the BT100 to the BT100 USB socket on the rear of the Minx Xi.

**2** Put the BT100 in pairing mode by pressing and holding the Bluetooth button on the remote control for 4-5 seconds, or by double pressing the button on the BT100 itself (note it is on the underside).

**3** Now pair with your phone/tablet/computer (you may need to consult your Bluetooth device's user manual for details). You only need to do this the once, as the BT100 will remember your Bluetooth device the next time you wish to use it.

**4** With a BT100 installed, 'Bluetooth' will appear as a menu item in the home menu. Use the rotary dial to select and play from this input.

## Audio inputs

The Minx Xi has two Analogue audio inputs, two Digital audio inputs and a front 3.5mm äMP3i input for the headphone output of portable players.

**1** Connect any analogue or digital sources to the Minx Xi

**2** The different Audio Inputs can be selected and played in three different ways:

- By pressing the input buttons on the remote control
- By navigating to the Audio inputs menu in the main menu.
- Using the app

## Get the free StreamMagic App

Stream Magic Remote is a free app for Apple and Android devices that allows full control of the Minx Xi including Internet Radio, Network Music playback, Streaming Services, Presets, Queuing and more, all from the comfort of your armchair.

Download the free Stream Magic app from the iTunes app store or Google Play store (requires iOS 4.3 or later/Android 2.3 or later).
