Cambridge Audio

Aero 6 floor standing speaker

- Whereas conventional speakers have the crossover between the woofer and tweeter situated right in the zone where our ears are most sensitive, Aero 6 uses a Balanced Mode Radiator (BMR) driver to seamlessly cover the range from 250Hz – 22kHz.
- Use of BMR driver moves traditional tweeter/woofer crossover point far away from the ears' most sensitive region and therefore eliminates the distortions caused by traditional crossover networks and removes timbre differences caused by different materials used for tweeter and woofer
- Twin sub-bass drivers are perfectly optimized to produce deep and powerful bass

Detailed Specifications

Sensitivity	90dB
Frequency response	30Hz – 22kHz
Impedance	8 Ohms compatible
Recommended amplifier power	25-120 Watts
Drivers	1 x 46mm (2") BMR 2 x 165mm (6.5") high power subwoofers
Ported	1 front
Colour	Black or Walnut
Dimensions (H x W x D)	980 x 240 x 338mm (38.6 x 9.4 x 13.3") including grille & plinth
Weight	16.9kg (37.3lbs) each
